

What is patient safety?

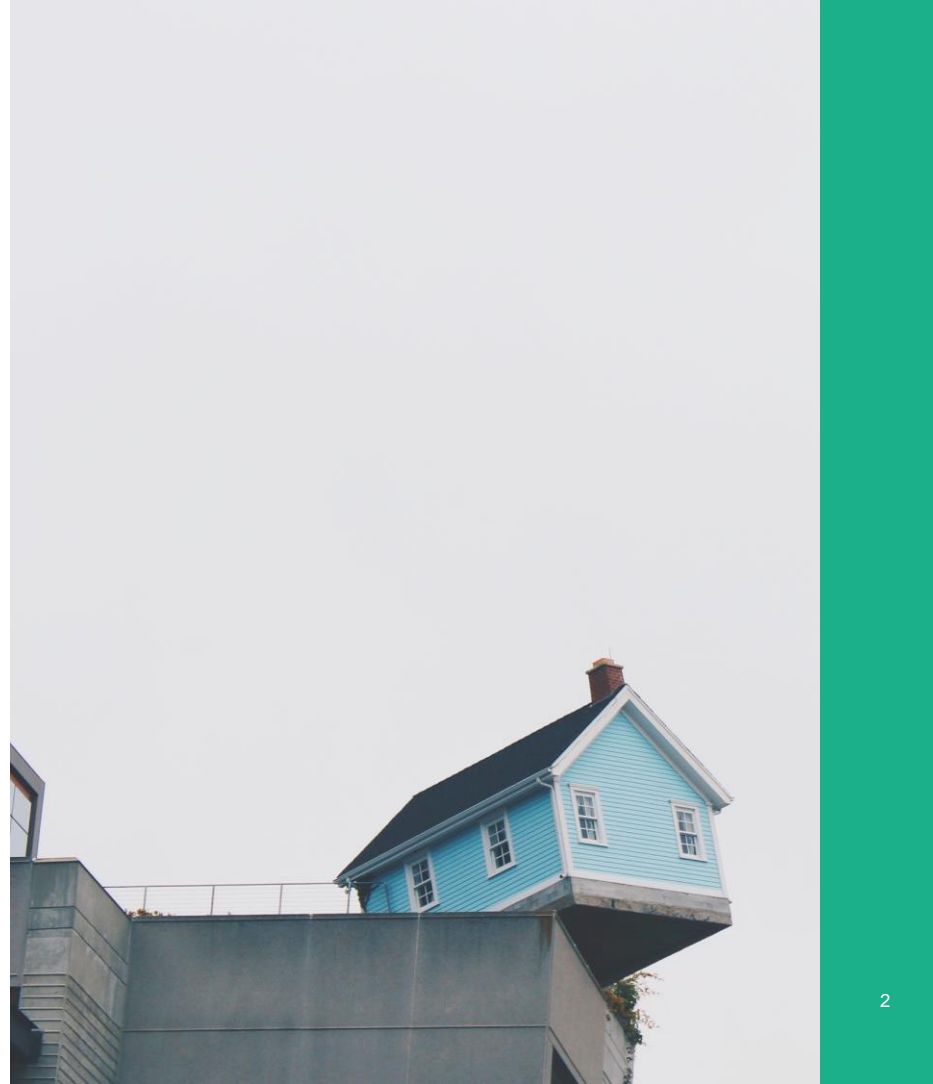

Support Workers in London Voice Network Event

London
29 March 2019

Mike Bird
Patient Safety Learning

Think of a time
when you have
seen something
unsafe...

What we hope you will learn

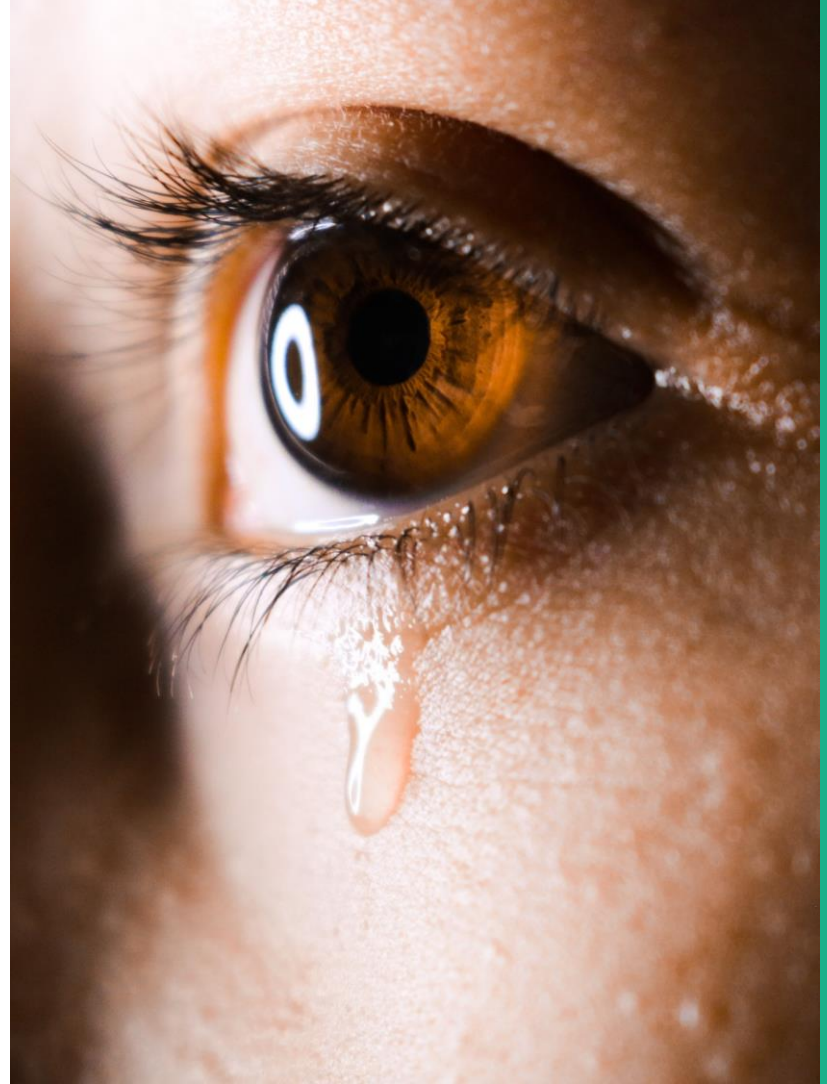

- To think in a new way about patient safety
- To understand how we can deliver it
- To look what we can do to make it happen

What is patient safety?

Why does patient safety matter?

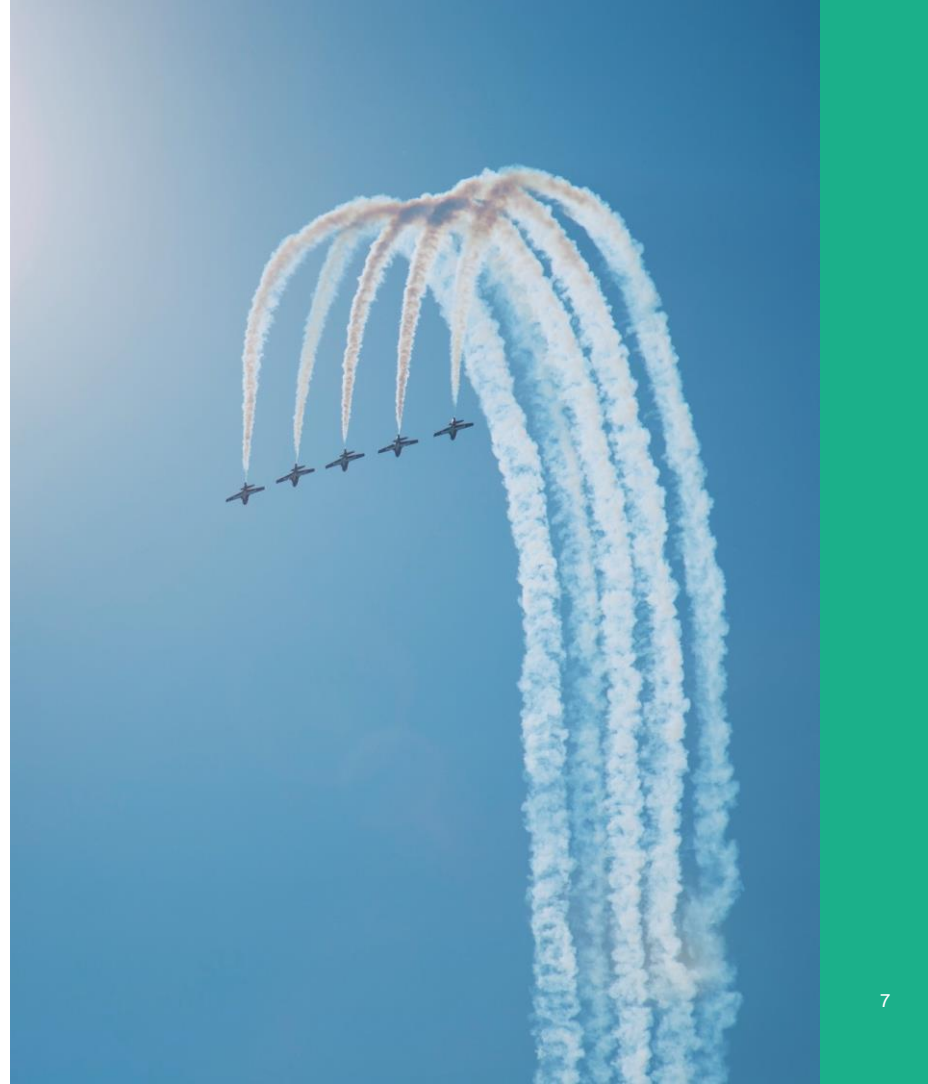

Patient safety really matters

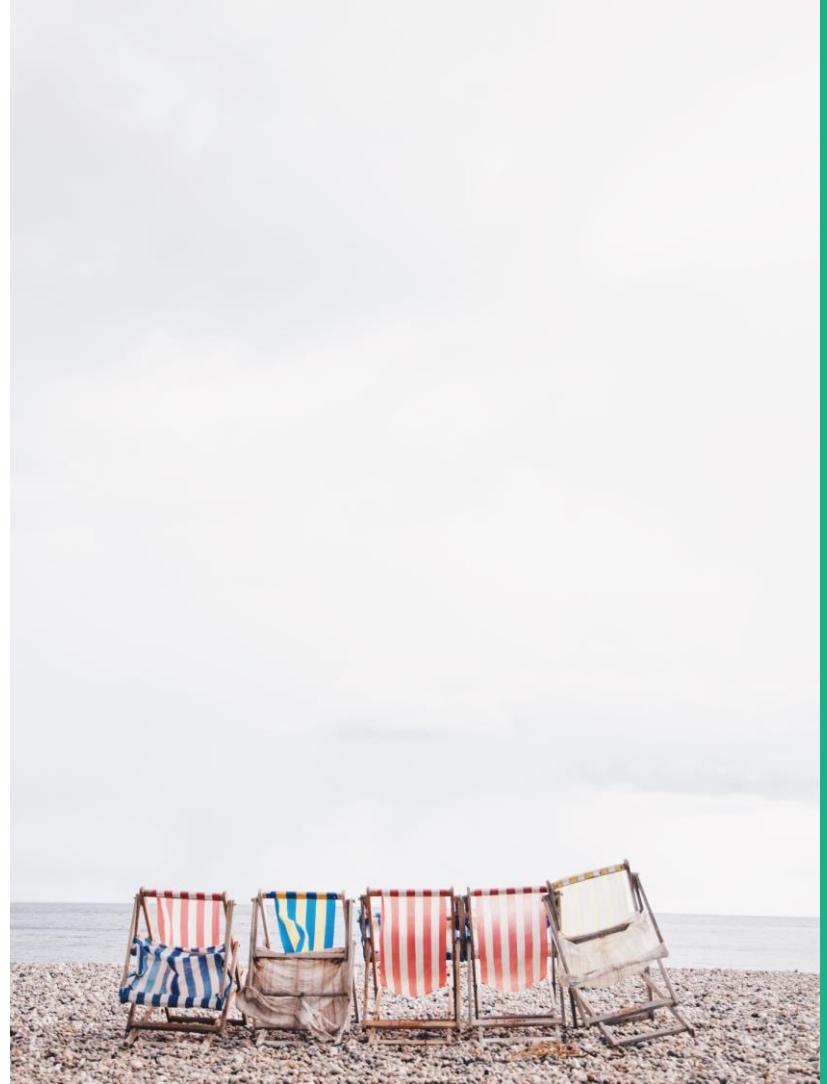

- Thousands die
- Tens of thousands suffer life-changing harm
- £ billions in restitution and additional care

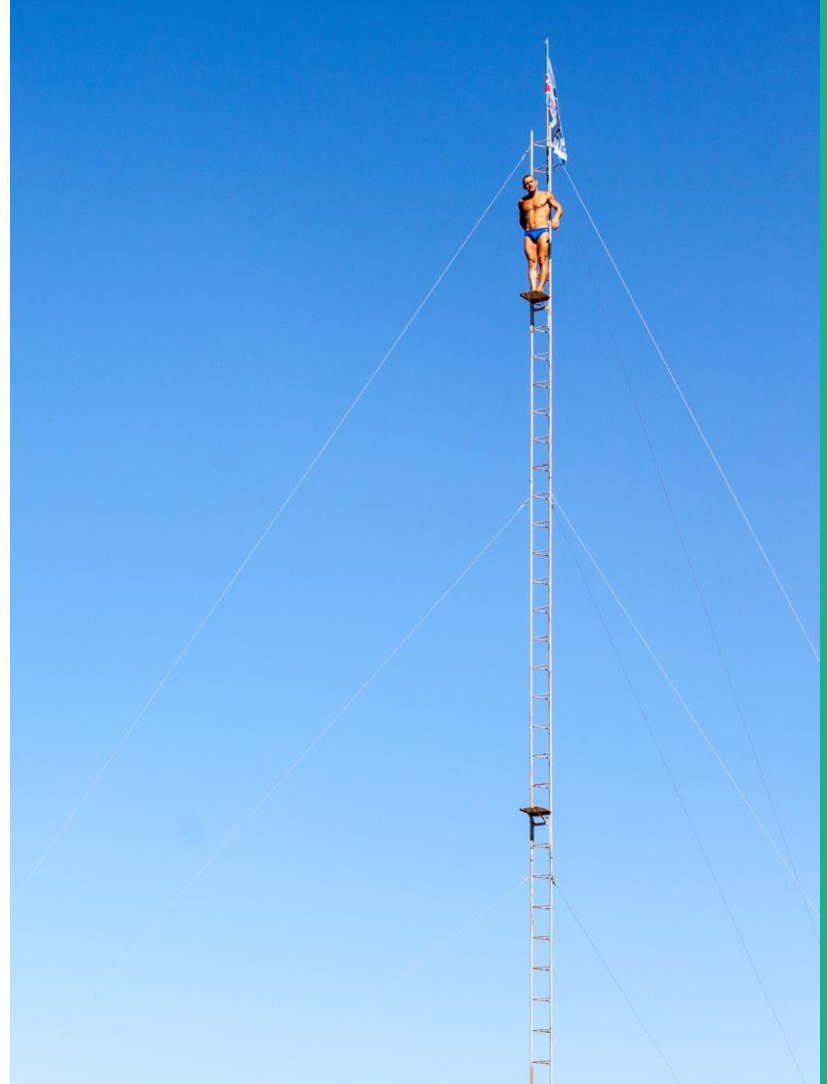

Many terrific
people are doing
great work

But after
twenty years,
still people suffer.

We need to act – now

We must think
differently about
patient safety

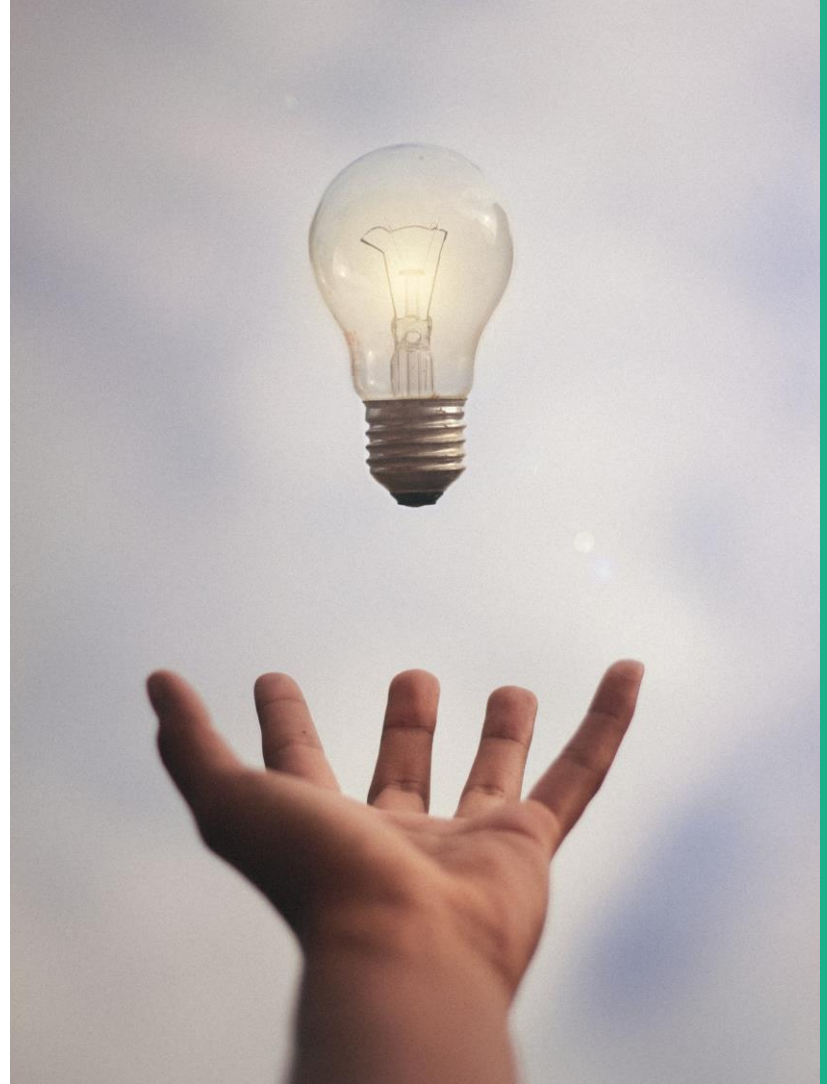

This is where
we come in...

patient
safety
learning

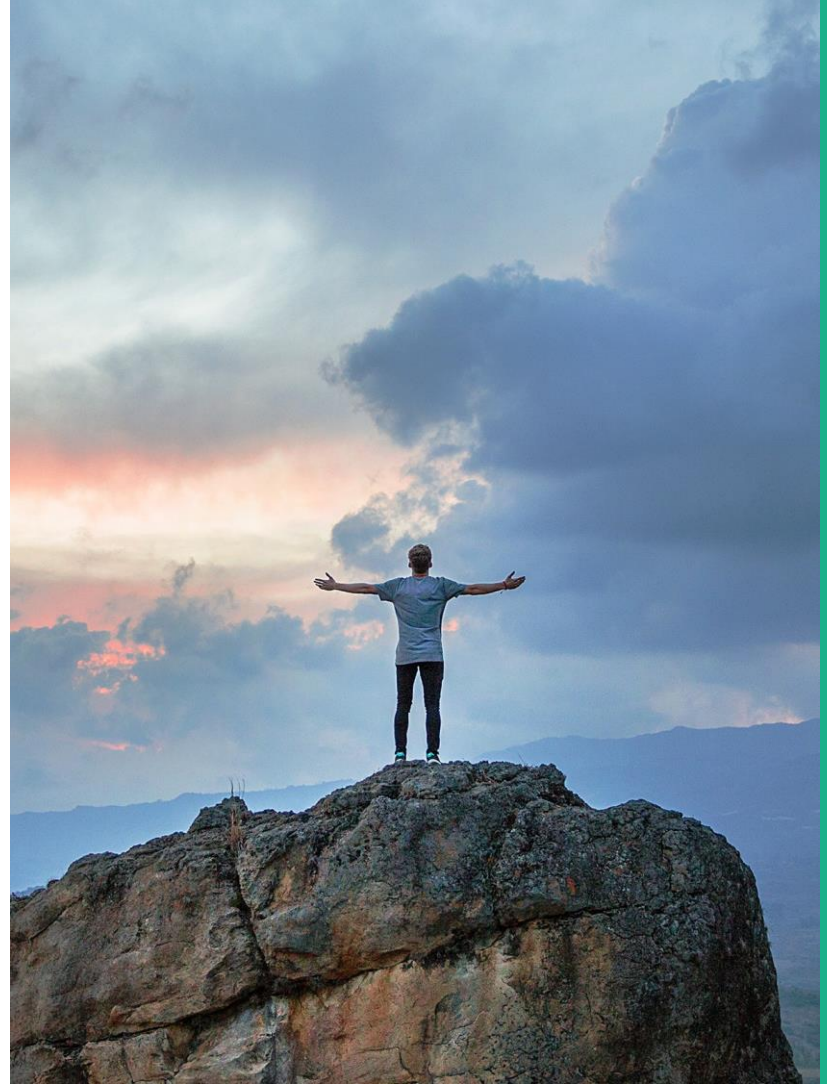

We aim to help
people to think
differently about
patient safety

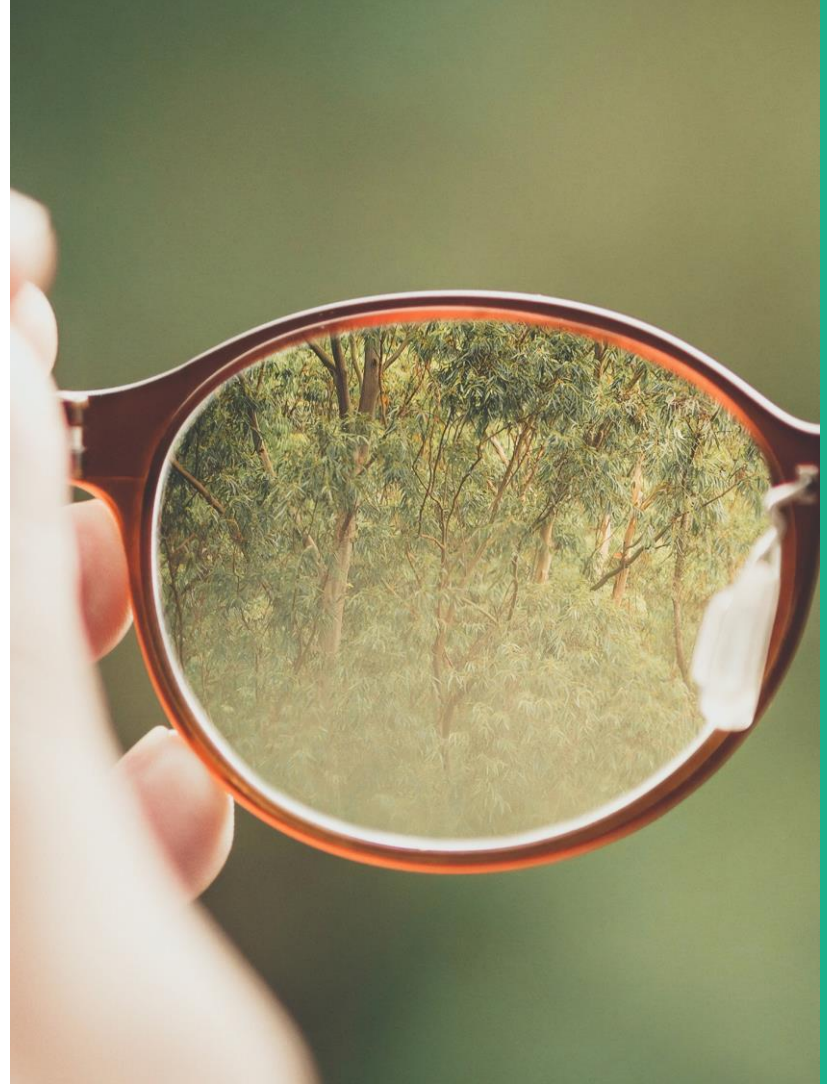

Unsafe care has systemic causes

We aspire to a patient-safe future

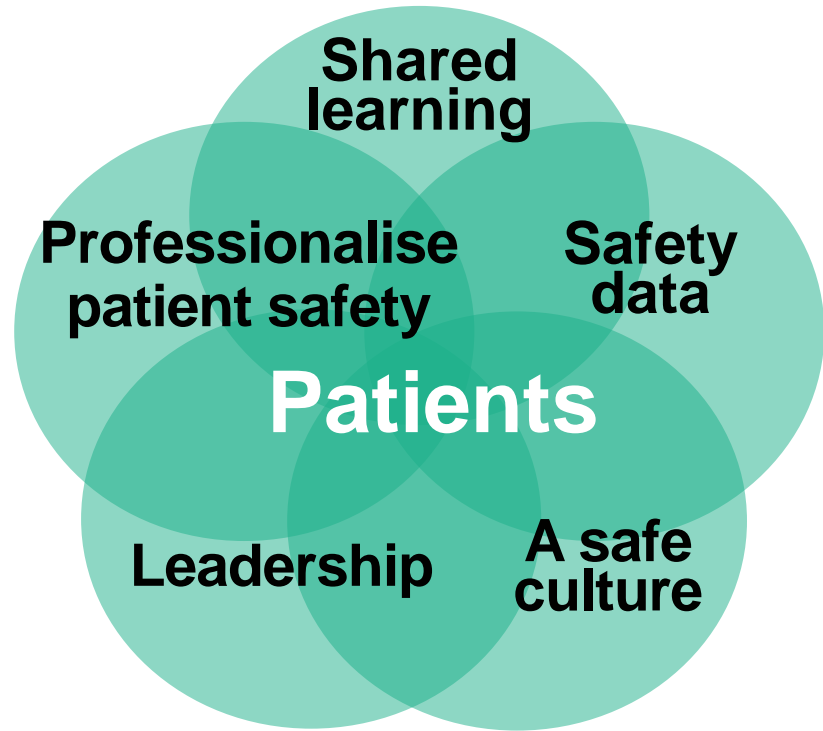

What will a patient-safe future look like?

How will we get there?

We have
a blueprint
for action...

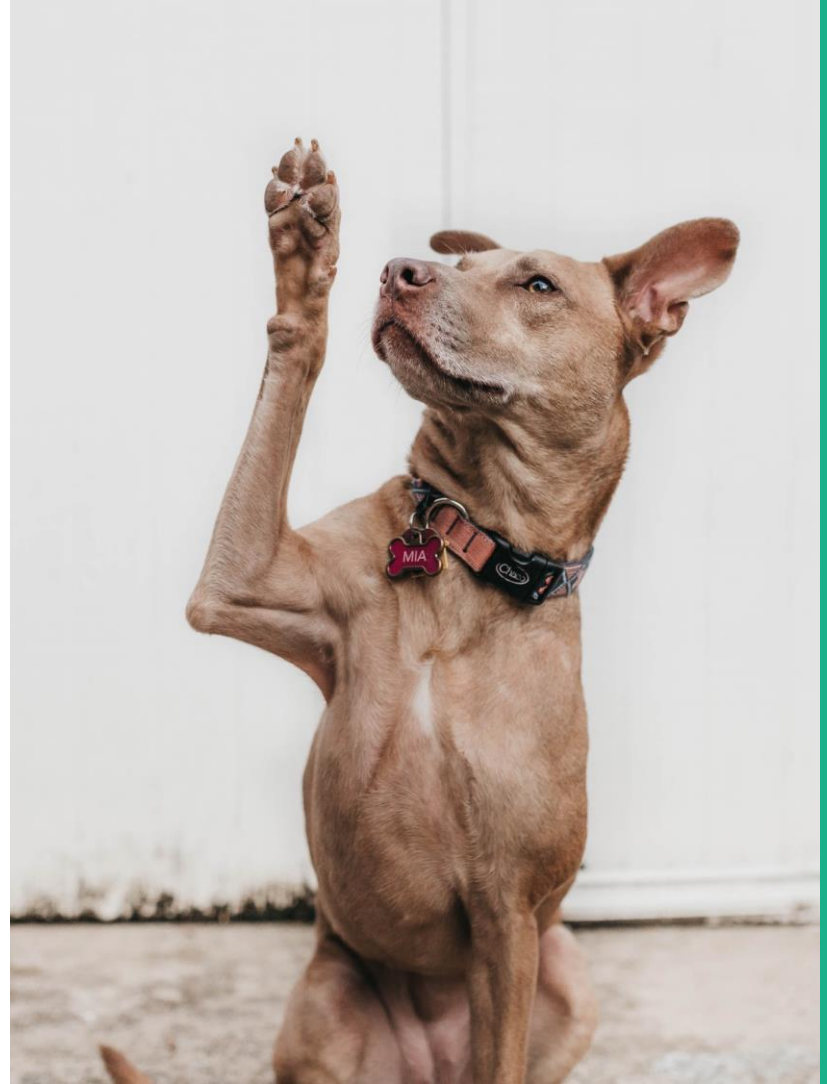

We are building
the hub

patient
safety
learning } *the hub*

Everyone can
help make a
patient-safe future

What questions do you have?

Find out more about how you can help develop the patient-safe future...
